DETAILED ACTION

Status of Claims

1. This communication is responsive to the amendment filed on August 15, 2005 where applicant amended claims 2-6,13,16,21-25,33 & 34, and cancelled claims 7-12,15,26-32,35 and 47. Claims 2-6,13,14,16-25,33,34 and 36-46 are pending.

Response to Arguments

2. Applicant's arguments with respect to claims 2-6,13,14,16-25,33,34 and 36-46 have been considered but are most in view of the new ground(s) of rejection. The rejections are as stated below.

Claim Objections

- 3. Claims 2 and 21 objected to because of the following informalities:
- 4. In line 4, place a comma after the limitation "of an entire website", to read "after an entire website, ...".
- 5. In claim 2 line 14, change "said websites" to "said website" (delete the 's').
- 6. In claim 2 line 20, change "the base" to "the base table".

Appropriate correction is required.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 2-6,13,14,16-25,33,34 and 36-46 rejected under 35 U.S.C. 103(a) as being unpatentable over Dan et al (US Patent No 6,560,639) in view of Banick et al ("Web Management with Microsoft Visual SourceSafe 5.0", Que Corporation, 1996).
- 9. In reference to claims 2 and 21, Dan teaches for use in a system for developing and maintaining web content configured to create and maintain web content from within one or more work areas for use in a website, a system and method respectively for automatically deploying data in a computer network upon the occurrence of an event (Abstract and column 1 lines 22-28) comprising:

a development server configured to develop web content to be displayed on a website and to develop other related data (column 2 lines 45-60, column 3 lines 45-51, column 8 lines 20-40 and column 11 lines 60-67); and

a deploy daemon configured to receive a signal from the development server, the signal indicating the occurrence of a trigger event that may cause data to be deployed, and configured to automatically deploy data to a destination upon occurrence of a such a trigger event in a manner transparent to a user of said one or more work areas (column 3 lines 12-51, column 4 lines 30-43, column 8 line 61 – column 9 line 17 and column 12 lines 10-50, Dan disclose a daemon deploying data to a database (i.e. a destination) upon user changes to a

Application/Control Number: 09/815,496

Art Unit: 2157

website(i.e. trigger event) where the user is not aware of a web management system (i.e. transparent to a user));

a base table that records and accumulates all changes to a website, including changes to website content, extended attributes of said website, and information related to said website (column 11 lines 15-25 and column 12 lines 25-30); and

a tracking table configured to manage the existence and relationship of the delta table and the base in the system (column 17 lines 35-46 and column 23 lines 1-8).

Dan fails to explicitly teach wherein each work area comprises virtual copy of an entire website. However, Banick teaches Visual SourceSafe which provides tools to create and make alterations to websites and track changes across users, projects, and time. Banick discloses checking-out a file for the purpose of modifying it (pages 52-55).

Dan fails to explicitly teach a delta table that represents changes made in a work area to website content, extended attributes of said website, and information related to said website. However, Banick discloses storing deltas of changes made to content, for the purpose of accumulating and tracking the history of changes to content (pages 10,86-88,95 and 114).

It would have been obvious for one of ordinary skill in the art to modify Dan by making each work area comprise a virtual copy of an entire website, and making a delta table that represents changes made in a work area to website content, extended attributes of said website, and information related to said website as per the teachings of Banick for the purpose of checking-out files for modification, and then tracking the changes to the content via delta format for subsequent merging and reconciliation.

10. In reference to claims 3 and 22, Dan teaches a system and method respectively according to Claims 2 and 21, wherein the deploy daemon includes software code configured to perform operations in response to the trigger event (column 3 lines 12-51, column 10 lines 34-42 and column 12 lines 10-50).

Page 5

- 11. In reference to claims 4 and 23, Dan teaches a system and method respectively according to Claims 2 and 21, wherein the deploy daemon includes software code configured to deploy data in response to the trigger event according to predetermined parameters (column 3 lines 12-51, column 10 lines 34-42 and column 12 lines 10-50).
- 12. In reference to claims 5 and 24, Dan teaches a system and method respectively according to Claims 2 and 21, wherein the deploy daemon includes software code configured to deploy data in response to the trigger event (column 3 lines 12-51, column 10 lines 34-42 and column 12 lines 10-50).
- 13. In reference to claims 6 and 25, Dan teaches a system and method respectively according to Claims 2 and 21, wherein the deploy daemon includes software code configured to deploy data in response to the trigger event according to parameters, and to perform operations on data to be deployed before deploying data (column 2 lines 55-67, column 11 lines 25-50 and column 12 lines 10-35).
- 14. In reference to claims 13,14,16,33 and 34, Dan teaches a system and method respectively according to Claims 2 and 21, wherein the system is configured to update the base table upon a trigger event (column 3 lines 45-51, column 5 lines 20-34, column 11 lines 15-25, column 12 lines 25-36, column 17 lines 40-46 and column 23 lines 1-25).

Application/Control Number: 09/815,496

Art Unit: 2157

15. In reference to claims 17 and 36, Dan teaches a system and method respectively according to Claims 2 and 21, wherein the storage of data from a work area is a trigger event, wherein the deploy daemon includes software code configured to confirm whether such storage has occurred and to perform operations in response such storage (column 3 lines 6-40 & 45-51 and column 4 lines 5-15 & 34-43).

Page 6

- 16. In reference to claims 18-20 and 37-39, Dan teaches a system and method respectively according to Claims 17 and 36, wherein the storage of data includes the storage of web content, meta data and extended attributes (column 3 lines 30-60, column 11 lines 15-25 and column 12 lines 25-36).
- 17. In reference to claims 40-42, Dan teaches a method according to Claim 21, wherein performing a predetermined action further comprises:

modifying the extended attributes of the web content; transmitting the retrieved data to a storage location; and storing the retrieved web content in the storage location (column 11 lines 25-37 & 63-67 and column 12 lines 12-45).

18. In reference to claims 43-46, Dan teaches the method according to Claim 21, wherein performing a predetermined action further comprises: deploying the retrieved data to a predetermined location (column 8 lines 35-40, column 10 lines 25-30 & 63-67 and column 12 lines 15-45).
